

Do NOT Use Windows Safari to Access Your Online Banking Account!

Effective August 8, 2013, the current and prior major release of Safari will be supported for Apple/Mac users only. Safari will no longer be a supported browser for Windows users. Because of the number of unpatched items for Windows Safari, we encourage you to use another browser to log into your online banking account. Do NOT use Windows Safari. You can use Safari for Apple/Mac.

Online Banking/Bill Payment Require Newer Versions of Web Browsers

Pendleton Community Bank online banking customers need to upgrade their web browsing software to the most recent version. This includes Internet Explorer, Firefox, Google Chrome, and Apple/Mac Safari.

Internet Banking/Bill Payment require the current version or the prior version of Internet Explorer and Firefox.

The most recent version of Safari for Apple/Mac is required. Windows Safari is not supported and should not be used to open your online banking account.

Only the current release of Google Chrome is supported.

Installing the most recent version of your web browser ensures that online banking and bill payment continue to operate correctly.

For more information on your favorite browser's encryption features and how to download updated versions of your browser, click on one of the following browser logos:
